Orgone dropped *Cali Fever*, their second album for Ubiquity earlier this year. They have also played a ton of dates including **Jazz Fest**, the **High Sierra Festival**, been touring with the **Roots**, and **Greyboy Allstars**, and opening for bands as varied as **Snoop Dogg**, **Sharon Jones and Gil Scott-Heron**. With new management pushing Orgone out to as many dates as they can handle, the band have been selling out of merch on every road trip - so they decided that it was time for a new album for their newfound and rapidly expanding fanbase.

Somehow, amidst their insane schedule they have put together a brand new, exclusive and all-instrumental album for Ubiquity called **Killion Vaults**.

Showcasing the bands instrumental side the album plays (and looks!) like an old-school library record packed with tunes for movies as yet unmade, and chase-scenes not yet driven. Like every Orgone record it shifts through multiple gears encompassing sly downtempo funk like the Hammond-drenched *Dramatic Times* and *The Interloper*, to bouncing percussion driven joints like *Counting One You* and *Impala*, while *Water Pot Pans* and *Dead Reckoning* add a nice new psychedelic-cinematic dimension to the Orgone sound.

Killion Vaults could easily be mistaken for a rare old collectible release, but as with all Orgone productions they made their blend of live organics as beefy as possible so it's a great DJ record as much as it is a good listen.

"Cali Fever is more than just another release it's a quantum leap forward, harnessing the kinetic energy of their live shows into an immediate, instantly danceable collection of cuts." -RCRDLBL

"Their strongest, most confident set yet, with wall-to-wall hard-hitting funk tracks featuring fiercely tight grooves with chicken-scratch guitar, floating keyboard lines, sharp horn riffs, popping bass, raw percussion and some supremely soulful vocalizing from lead singer Fanny Franklin."

-KEXP, SEATTLE
